### Legislation

- A 690** Seeks to exempt individuals with certain types of military service from certain fees and continuing education or professional competency requirements. It was introduced on or about January 12, 2012 by Assemblyperson Kean (Monmouth and Ocean) and referred to the Assembly Committee on Regulated Businesses.

The Executive Committee reviewed this bill and suggested that it not be supported. The Committee noted that the ability to complete the required Continuing Medical Education requirements can be accomplished via the internet and there should not be any problems in meeting the established requirement. It further noted that the Continuing Medical Education requirement was an essential element of helping to assure that licensees are current in their medical knowledge. Finally, the Committee noted that the existing regulation already provides a waiver provision in which extensions to complete the requirement can be obtained.
