STATE OF NEW JERSEY
DEPARTMENT OF LAW & PUBLIC SAFETY
DIVISION OF CONSUMER AFFAIRS
BOARD OF MEDICAL EXAMINERS

IN THE MATTER OF AN APPLICATION
FOR LICENSURE BY

MICHAEL SCHUTZ, M.D.

TO PRACTICE MEDICINE AND
SURGERY IN THE STATE OF
NEW JERSEY

Administrative Action

ORDER DENYING LICENSURE

This matter was presented to the New Jersey State Board of Medical Examiners by application of Michael J. Schutz to practice medicine and surgery. The applicant, of P.O. Box 325, Three Bridges, New Jersey 08887, is presently in his second year of post-graduate training at the University of Medicine and Dentistry. He is represented herein by his brother, Matthew R. Schutz, Esq. The applicant appeared before a Board Committee to address questions regarding his eligibility for licensure. In light of his admission that he had been arrested for an offense involving drugs, he also agreed to a release of certain police reports for Board

CERTIFIED TRUE COPY

review. The following matters are deemed by the Board to be significant to the licensure application.

On March 9, 1984, a raid was conducted by the New Brunswick Police Force at the Alpha Delta Epsilon Fraternity House in New Brunswick. The police entry was authorized by search warrant issued by the Superior Court based upon affidavits reporting the presence of quantities of illegal drugs and paraphernalia throughout the premises and frequent drug sales made by persons residing there. Some 17 persons were arrested the night of the raid on a variety of charges, some of which were referred for Grand Jury consideration for possible indictment. Among those arrested were Matthew R. Schutz, who resided in the building, and Michael J. Schutz, who states he was attending a party there and visiting his brother and decided to spend the night. Michael Schutz was arrested on Complaint No. SM93227, NB84-7983 and RU0496-84G. He was charged with possession of marijuana under 25 grams, in violation of N.J.S.A. 24:22-20(a)(4), after he admitted to the police that he was the owner of a bag of marijuana stuffed into his shoe which was found in his brother's bedroom. Michael Schutz acknowledges that he had purchased approximately 3 grams of marijuana that evening at the party, paying \$40 a gram, and had approximately two grams remaining from the purchase at the time of the arrest.

It appears that due to certain administrative problems relating to processing of the large number of arrest reports, neither the case against Michael nor that against his brother

Matthew had been concluded by the time of the applicant's appearance before the Board. Since that date, the charges against both men have been dismissed (Order of January 15, 1987 by Municipal Court Judge Frank J. Jess, J.S.C.)

On inquiry as to the extent of drug use prior to the arrest, the applicant stated that he had begun using marijuana in college and was using it approximately four times a week. After initially stating to the Board Committee that he purchased it only for personal consumption, he later acknowledged that he purchased it in sufficient quantity to resell some of it to his friends. He vigorously denies making a profit on those sales. Asked if he used any other drugs, he first stated that he might have used cocaine while in college, but only twice. Later, during his interview, he acknowledged that he had also used it once or twice during his third and fourth year of medical school; he strenuously denied ever using it during his residency and denied that he had ever been impaired while on surgery duty with his patients. He then acknowledged having used cocaine only six to nine months before the Board interview, i.e. long after his criminal arrest and before the criminal matter has been concluded. Moreover, he acknowledged continuing to use marijuana about six times since the date of the arrest, and compared the use of it to the drinking of beer at a corner bar for social purposes and relaxation.

The Board is extremely concerned about the casual attitude expressed by this applicant towards drugs, the use of which is known to result in impairment of mental and physical faculties and

which drugs have been declared unlawful for purchase, possession or consumption in the circumstances exhibited by this applicant. The attitudes expressed by Michael Schutz are inimical to the policies of this government for the public health, safety and welfare and to the responsibility to which physicians are sworn. The Board is particularly dismayed that the illegal drug use, including that of cocaine, continued well after the arrest and during the surgical residency. On March 10, 1987 the Board issued a provisional Order denying licensure, informing Dr. Schutz of its proposed finding of fact and conclusions of law and permitting him to respond. He has done so, through his attorney, on March 28, 1987. The Board has carefully considered that response against the testimony in the transcript of Dr. Schutz' appearance before the Board Committee, and has made such changes in detail as are supported by the total record. The Board find none of the submitted material to warrant further proceedings of any type and therefore issues its final determination at this time.

In light of the background of this matter, and for good cause shown,

IT IS, on this ~~20th~~ day of *April* 1987

ORDERED

that the application for medical licensure by Michael J. Schutz, M.D. is hereby denied at this time for failure to meet the statutory pre-requisite of good moral character mandated by N.J.S.A. 45:9-6. Dr. Schutz may reapply no earlier than one year from the

filing date of this denial on the following express conditions only:

1. During the minimum period of one (1) year before Dr. Schutz reapplies to this Board, he shall participate actively with the activities of the Impaired Physician's Committee, conducted by the Medical Society of New Jersey, including unannounced urine screening, and shall authorize quarterly reports to be prepared and submitted to this Board by the Director thereof.
2. He shall submit proof of satisfactory completion of the Mini-Residency in Controlled Dangerous Substances sponsored by the University of Medicine and Dentistry of New Jersey and shall authorize the Director thereof to submit a report evaluating Dr. Schutz's work in the didactic and clinical portion of the course.
3. He shall submit to a psychiatric evaluation at his own expense by a Board-appointed psychiatrist.
4. He shall be permitted to remain in an approved post-graduate training program, on condition that his supervisor agrees to provide a more intensive degree of supervision in light of the background of this matter, and such agreement is filed by letter with the Board. The supervisor shall thereafter file a quarterly report regarding Dr. Schutz' performance in the residency program, and shall agree to notify the Board in the event of any termination

of the residency position or any failure to meet the standards of character and performance required in the residency.
