

New Jersey's Prescription Drug Retail Price Registry

PRESCRIPTION DRUG

Retail Price Registry

(consumer *brief*)

NEW JERSEY'S PRESCRIPTION DRUG RETAIL PRICE REGISTRY

The New Jersey Prescription Drug Retail Price Registry is available to help consumers compare the retail prices charged by many pharmacies for the 150 most-frequently prescribed prescription drugs.

By comparing prices, consumers can see what a pharmacy is charging for a specific prescription drug without having to call or visit each pharmacy. Comparing the prices listed in the Registry will help a consumer find the pharmacy in his or her area with the lowest retail price for a specific prescription drug.

HOW TO USE NEW JERSEY'S PRESCRIPTION DRUG RETAIL PRICE REGISTRY

To use this Registry, go to www.njdrugprices.nj.gov. Once the medication and dosage have been selected, consumers can put in their local ZIP code to check prices at area pharmacies.

The New Jersey Prescription Drug Retail Price Registry is updated weekly. Please note that prices in the Registry are not guaranteed due to the fact that the prices may change on a daily basis.

The prices displayed in the Registry are compiled from the most recent claims submitted by licensed New Jersey pharmacies to the New Jersey Division of Medical Assistance and Health Services as their "usual and customary" prices. If a pharmacy did not submit a claim for a particular drug and dosage during the reporting

period, the Registry will not include data for that pharmacy/drug/dosage during that reporting period.

150 most-frequently prescribed prescription drugs

Please note that there are in fact more than 150 entries in the Registry. This is due to two facts: 1) Each drug may be sold in different dosages (e.g. Lipitor 10 mg. or Lipitor 20 mg.), and 2) Each drug may be sold in a variety of methods of delivery (e.g. tablets, capsules, capsules, chewable tablets, patches, suppositories, syrups or liquids for syringes).

Rank	Medication	Rank	Medication
001	Lipitor	054	Actonel
