45:9-1. State Board of Medical Examiners; advisory committee.

The State Board of Medical Examiners, hereinafter in this chapter designated as the "board" shall consist of 21 members, one of whom shall be the Commissioner of Health, or the commissioner's designee, three of whom shall be public members and one an executive department designee as required pursuant to section 2 of P.L.1971, c.60 (C.45:1-2.2), and 16 of whom shall be persons of recognized professional ability and honor, and shall possess a license to practice their respective professions in New Jersey, and all of whom shall be appointed by the Governor in accordance with the provisions of section 2 of P.L.1971, c.60 (C.45:1-2.2); provided, however, that said board shall consist of 12 graduates of schools of medicine or osteopathic medicine who shall possess the degree of M.D. or D.O. The number of osteopathic physicians on the board shall be a minimum of, but not limited to, two members. In addition the membership of said board shall comprise: one podiatric physician who does not possess a license to practice in any other health care profession regulated under Title 45 of the Revised Statutes; one physician assistant; one certified nurse midwife; and one licensed bio-analytical laboratory director, who may or may not be the holder of a degree of M.D. The term of office of members of the board hereafter appointed shall be three years or until their successors are appointed. A member is eligible for reappointment for one additional term of office, but no member shall serve more than two consecutive terms of office. Said appointees shall, within 30 days after receipt of their respective commissions, take and subscribe the oath or affirmation prescribed by law and file the same in the office of the Secretary of State.

Its president, or secretary, may issue subpoenas to compel attendance of witnesses to testify before the board and administer oaths in taking testimony in any matter pertaining to its duties, which subpoenas shall issue under the seal of the board and shall be served in the same manner as subpoenas issued out of the Superior Court of this State. Every person who refuses or neglects to obey the command of such subpoena, or who, after appearing, refuses to be sworn and testify shall, in either event, be liable to a penalty of $50.00 to be sued for in the name of the board in any court of competent jurisdiction, which penalty when collected shall be paid to the treasurer of said board. It shall make and adopt all necessary rules, regulations and bylaws not inconsistent with the laws of the State or of the United States, whereby to perform the duties and to transact the business required under the provisions of this article (section 45:9-1 et seq.).

The board shall charge for licenses and other services performed by it the fees provided in chapter 9 of Title 45 of the Revised Statutes, or where not so provided, such fees as it shall prescribe by rule or regulation. The board shall make such disposition of all fees and moneys collected by it and such reports in connection therewith as directed by the Director of the Division of Budget and Accounting.

45:9-5.2. Needle electromyography, interpretation restricted to physicians, surgeons.

a. A person shall not perform needle electromyography unless that person is licensed to practice medicine and surgery in this State pursuant to chapter 9 of Title 45 of the Revised Statutes.

A person shall not interpret evoked potentials or nerve conduction studies unless that person is licensed to practice: medicine and surgery in this State pursuant to chapter 9 of Title 45 of the Revised Statutes; audiology in this State pursuant to chapter 3B of Title 45 of the Revised Statutes; or chiropractic in this State pursuant to chapter 9 of Title 45 of the Revised Statutes.

L.2005, c.303, s.1; amended 2009, c.212.

45:9-6. License required to practice medicine or surgery; applications; educational requirements; citizenship

All persons commencing the practice of medicine or surgery in this State shall apply to the board for a license so to do. The board shall, except as herein otherwise provided, examine all qualified applicants for such a license. Every applicant shall present to the secretary of the board, at least 20 days before the commencement of the examination at which he desires to be examined, a written application for admission to the examination on a form provided by the board, together with satisfactory proof that he is more than 21 years of age, of good moral character, and a citizen of the United States or has declared his intention to become such a citizen. He shall also present to the board a certificate of the Commissioner of Education of this State showing that, before entering a professional school or college, he had obtained an academic education consisting of a 4 years' course of study in an approved public or private high school or the equivalent thereof. Any license issued to an applicant prior to becoming a citizen of the United States shall be a temporary license and subject to the provisions of Revised Statutes 45:9-14.

Amended by L.1939, c. 115, p. 403, s. 6; L.1968, c. 16, s. 1, eff. April 11, 1968.

All persons who are licensed to practice medicine and surgery shall be required on or before July 1 biennially to register on the form prescribed by the board and furnished by the executive director of the board, and to pay a biennial registration fee to be determined by the board.

The license of any licensee who fails to procure any biennial certificate of registration, shall be automatically suspended on July 1. It shall be the duty of the executive director of the board on June 1 of each year to send a written notice to each licensee whose license is expiring that year, whether a resident or not, at his last address on file with the board, that his biennial registration fee is due on or before July 1 and that his license to practice in this State will be suspended if he does not procure said certificate by July 1 of that year.

Any licensee whose license has been suspended under this section may be reinstated by the payment of all past due annual registration fees and in addition thereto a fee to be determined by the board to cover cost of reinstatement.

Any person who desires to retire from the practice of medicine and surgery, and during retirement to refrain from practicing under the terms of his license, upon application to the executive director of
the board, may be registered biennially, without the payment of any registration fee, as a retired physician. The certificate of registration which shall be issued to a retired physician shall state, among other things, that the holder has been licensed to practice in New Jersey, but that during his retirement he shall not so practice. The holder of a certificate of registration as a retired licensee shall be entitled to resume practice at any time; provided, he first shall have obtained from the executive director a biennial certificate of registration as hereinbefore provided.

If an applicant for reinstatement of licensure has not engaged in practice in any jurisdiction for a period of more than five years, or the board's review of the reinstatement application establishes a basis for concluding that there may be clinical deficiencies in need of remediation, before reinstatement the board may require the applicant to submit to, and successfully pass, an examination or an assessment of skills. If that examination or assessment identifies clinical deficiencies or educational needs, the board may require the licensee, as a condition of reinstatement of licensure, to take and successfully complete any educational training, or to submit to any supervision, monitoring or limitations, as the board determines are necessary to assure that the licensee practices with reasonable skill and safety.

The license to practice medicine and surgery of any person who fails to procure any biennial certificate of registration, or in lieu thereof a biennial certificate of registration as a retired licensee, at the time and in the manner required by this act shall be automatically suspended. Any person whose license shall have been automatically suspended shall, during the period of such suspension, be regarded as an unlicensed person and, in case he shall continue or engage in practice under the terms of his license during such period, shall be liable to the penalties prescribed by R.S.45:9-22. Any person to whom a certificate of registration as a retired licensee shall have been issued who shall continue or engage in practice under the terms of his license without first having obtained a certificate of registration authorizing him to resume such practice, shall be liable to the penalties prescribed by R.S.45:9-22 for practicing without a license.

It shall be the duty of each such licensee holding a certificate to practice medicine and surgery in this State, whether a resident or not, to notify the executive director of the board in writing of any change in his office address or his employment within ten days after such change shall have taken place.

This section shall not be construed so as to render inoperative the provisions of R.S.45:9-17.

L.1971,c.236,s.1; amended 2001, c.307, s.5.

45:9-7. Premedical educational requirements

Except as otherwise provided in chapter 9 of Title 45 of the Revised Statutes, every applicant for admission to examination for a license to practice medicine and surgery shall also present proof acceptable to the board demonstrating that in addition to, and subsequent to, obtaining the preliminary education specified in R.S.45:9-6, and prior to commencing his study in a professional school or college, he had completed a satisfactory course in a college or school of arts and science accredited by an agency recognized by the board, the duration of such course to have been two years during which period he had earned no less than 60 credits, which credits include one three-credit course each in chemistry, physics and biology.

An applicant whose premedical education does not meet the requirements set forth in this section may, at the discretion of the board, be permitted to remediate the substantive deficiencies in a manner determined by rules adopted by the board, and be deemed eligible for licensure. The board may waive the educational requirements of this section for any applicant who demonstrates that he has attained the substantial equivalent of these requirements through his post-secondary education, competency, accomplishments and achievements in the practice of medicine and surgery.
45:9-7.1. Continuing medical education required as condition for biennial registration.

a. Except as provided in paragraph (2) of subsection d. of this section, the State Board of Medical Examiners shall require each person licensed as a physician, as a condition for biennial registration pursuant to section 1 of P.L.1971, c.236 (C.45:9-6.1), or as a podiatrist, as a condition for biennial registration pursuant to R.S.45:5-9, to complete a requisite number of credits of continuing medical education, all of which shall be in Category I or Category II as defined in subsection i. of this section.

b. The board shall:

(1) Establish standards for continuing medical education, including the subject matter and content of courses of study;

(2) Accredit education programs offering credit toward continuing medical education requirements or recognize national or State organizations that may accredit education programs;

(3) Allow satisfaction of continuing medical education requirements through equivalent educational programs, such as participation in accredited graduate medical education programs, examinations, papers, publications, scientific presentations, teaching and research appointments and scientific exhibits, and establish procedures for the issuance of credit upon satisfactory proof of attainment of these equivalent educational programs;

(4) Create an advisory committee to be comprised of at least five members, including representatives of the Medical Society of New Jersey, the Academy of Medicine of New Jersey, the New Jersey Association of Osteopathic Physicians and Surgeons, the New Jersey Podiatric Medical Society and such other professional societies and associations as the board may identify, to provide guidance to the board in discharging its responsibilities pursuant to this section; and

(5) Establish, through the promulgation of regulations, any specific courses or topics which, on the recommendation of the advisory committee created pursuant to paragraph (4) of this subsection and in the discretion of the board, are to be required, and designate which are the core requirements for continuing medical education, including the number of required hours, subject matter and content of courses of study.

c. Each hour of an educational course or program shall be equivalent to one credit of continuing medical education.

d. (1) The board may, in its discretion, waive requirements for continuing medical education on an individual basis for reasons of hardship such as illness or disability, retirement of license, or other good cause. A waiver shall apply only to the current biennial renewal period at the time of board issuance.

(2) The board may offset up to 10 percent of the requisite number of credits for continuing medical education biennially by the number of hours of volunteer medical services rendered by licensees, at the rate of one half of one credit of continuing medical education for each hour of volunteer medical service rendered, provided that such licensees shall be required to complete at least the core requirements established pursuant to paragraph (5) of subsection b. of this section. The board may reduce, in part, an application by a licensee to offset credits of...
continuing medical education pursuant to this paragraph if the board finds, in its discretion, that
the applicant requires such continuing medical education in order to maintain or restore
professional competence, or may deny all such applications if the board finds that continuing
medical education above the core requirements is necessary because of developments in
science or technology. The board may also, in its discretion, and for good cause, notify a
licensee that the licensee is ineligible to offset credits of continuing medical education pursuant
to this paragraph for any other reason established by regulation by the board.

e. The board shall not require completion of continuing medical education credits for any
registration period commencing within 12 months of the effective date of this section.

f. The board shall require completion of medical education credits on a pro-rated basis for any
registration period commencing more than 12 months but less than 24 months from the effective
date of this section.

g. The board shall require new licensees to successfully complete, within 24 months of becoming
licensed, an orientation course, in those topics identified by the board through regulation,
conducted by an organization recognized by the board.

h. The board shall not require a new licensee to complete required continuing medical education
credits, other than the orientation course described in subsection g. of this section, for any
registration period commencing within 12 months of the licensee's participation in and completion
of an accredited graduate medical education program.

i. As used in this section:

"Category I and Category II" means those categories of medical education courses recognized by the
American Medical Association, the American Osteopathic Association, the American Podiatric Medical
Association, the Accreditation Council for Continuing Medical Education or other comparable
organizations recognized by the board;

"Core requirements" means the continuing medical education determined by the board to be
necessary to maintain currency in professional knowledge and skills in order to deliver competent care
to patients; and

"Volunteer medical services" means medical care provided without charge to low-income patients
for health care services for which the patient is not covered by any public or private third party payer, in
accordance with such standards, procedures, requirements and limitations as are established by the
board.

L.2001, c.307, s.10; amended 2010, c.89, s.1.

The State Board of Medical Examiners, pursuant to the "Administrative Procedure Act," P.L.1968,
c.410 (C.52:14B-1 et seq.), may adopt rules and regulations necessary to effectuate the purposes of this
act.

L.2010, c.89, s.4.
45:9-7.2. Findings, declarations relative to medical education in providing culturally competent health care.

The Legislature finds and declares that:

a. The findings of a recently reported, federally-funded study by Georgetown University, in conjunction with the Rand Corporation and the University of Pennsylvania, which were published in the New England Journal of Medicine, indicate that physicians are far less likely to refer blacks and women than white men with identical complaints of chest pain to heart specialists for cardiac catheterization; and the authors of this study suggest that the difference in referral rates stems from racial and sexual biases;

b. These findings are the latest in a growing body of medical literature which documents race and gender-based disparities in the provision of health care, especially in the treatment of cardiovascular disease; however, according to the Surgeon General of the United States, the Georgetown University study represents the best attempt to date to document the racial attitudes of physicians as a factor in the poorer health of African Americans;

c. It is estimated that the minority population in the United States will increase by 60% between now and the year 2010;

d. Cultural awareness and cultural competence are essential skills for providing quality health care to a diverse patient population;

e. Only a small percentage of medical schools nationwide currently provide some formal training in cultural competence;

f. The Association of American Medical Colleges is working to help medical schools improve the teaching of cultural competency; and

g. The public interest in providing quality health care to all segments of society dictates the need for a formal requirement that medical professionals be trained in the provision of culturally competent health care as a condition of licensure to practice medicine in New Jersey.

L.2005,c.53,s.1.

45:9-7.3. Requirements for physician training in cultural competency.

The State Board of Medical Examiners shall prescribe the following requirements for physician training, by regulation, in consultation with the Commission on Higher Education:

a. The curriculum in each college of medicine in this State shall include instruction in cultural competency designed to address the problem of race and gender-based disparities in medical treatment decisions and developed in consultation with the Association of American Medical Colleges or another nationally recognized organization which reviews medical school curricula.

b. Completion of cultural competency instruction as provided in subsection a. of this section shall be required as a condition of receiving a diploma from a college of medicine in this State.

k. The commission shall, by majority vote of all members, take final action on the proposed rule and shall determine the effective date of the rule, if any, based on the rulemaking record and the full text of the rule.

l. Upon determination that an emergency exists, the commission may consider and adopt an emergency rule without prior notice, opportunity for comment, or hearing, provided that the usual rulemaking procedures provided in the compact and in this section shall be retroactively applied to the rule as soon as reasonably possible, in no event later than 90 days after the effective date of the rule. For the purposes of this provision, an emergency rule is one that must be adopted immediately in order to:

   (1) meet an imminent threat to public health, safety, or welfare;

   (2) prevent a loss of commission or member state funds;

   (3) meet a deadline for the promulgation of an administrative rule that is established by federal law or rule; or

   (4) protect public health and safety.

m. The commission or an authorized committee of the commission may direct revisions to a previously adopted rule or amendment for purposes of correcting typographical errors, errors in format, errors in consistency, or grammatical errors. Public notice of any revisions shall be posted on the website of the commission. The revision shall be subject to challenge by any person for a period of 30 days after posting. The revision may be challenged only on grounds that the revision results in a material change to a rule. A challenge shall be made in writing, and delivered to the chair of the commission prior to the end of the notice period. If no challenge is made, the revision will take effect without further action. If the revision is challenged, the revision may not take effect without the approval of the commission.

Section 10. Oversight, Dispute Resolution, and Enforcement.

10. a. The executive, legislative, and judicial branches of state government in each member state shall enforce this compact and take all actions necessary and appropriate to effectuate the compact’s purposes and intent. The provisions of this compact and the rules promulgated hereunder shall have standing as statutory law. All courts shall take judicial notice of the compact and the rules in any judicial or administrative proceeding in a member state pertaining to the subject matter of this compact which may affect the powers, responsibilities or actions of the commission. The commission shall be entitled to receive service of process in any judicial or administrative proceeding, and shall have standing to intervene in such a proceeding for all purposes. Failure to provide service of process to the commission shall render a judgment or order void as to the commission, this compact, or promulgated rules.
b. If the commission determines that a member state has defaulted in the performance of its obligations or responsibilities under this compact or the promulgated rules, the commission shall:

(1) provide written notice to the defaulting state and other member states of the nature of the default, the proposed means of curing the default and any other action to be taken by the commission; and

(2) provide remedial training and specific technical assistance regarding the default.

If a state in default fails to cure the default, the defaulting state may be terminated from the compact upon an affirmative vote of a majority of the member states, and all rights, privileges and benefits conferred by this compact may be terminated on the effective date of termination. A cure of the default does not relieve the offending state of obligations or liabilities incurred during the period of default.

Termination of membership in the compact shall be imposed only after all other means of securing compliance have been exhausted. Notice of intent to suspend or terminate shall be given by the commission to the governor, the majority and minority leaders of the defaulting state's legislature, and each of the member states. A state that has been terminated is responsible for all assessments, obligations, and liabilities incurred through the effective date of termination, including obligations that extend beyond the effective date of termination.

The commission shall not bear any costs related to a state that is found to be in default or that has been terminated from the compact, unless agreed upon in writing between the commission and the defaulting state. The defaulting state may appeal the action of the commission by petitioning the U.S. District Court for the District of Columbia or the federal district where the commission has its principal offices. The prevailing member shall be awarded all costs of litigation, including reasonable attorney's fees.

c. Upon request by a member state, the commission shall attempt to resolve disputes related to the compact that arise among member states and between member and non-member states. The commission shall promulgate a rule providing for both mediation and binding dispute resolution for disputes as appropriate.

d. The commission, in the reasonable exercise of its discretion, shall enforce the provisions and rules of this compact. By majority vote, the commission may initiate legal action in the United States District Court for the District of Columbia or the federal district where the commission has its principal offices against a member state in default to enforce compliance with the provisions of the compact and its promulgated rules and bylaws. The relief sought may include both injunctive relief and damages. In the event judicial enforcement is necessary, the prevailing member shall be awarded all costs of litigation, including reasonable attorney's fees. The remedies herein shall not be the exclusive remedies of the commission. The commission may pursue any other remedies available under federal or state law.

Section 11. Date of Implementation of the Commission and Associated Rules, Withdrawal, and Amendment.

11. a. The compact shall come into effect on the date on which the compact statute is enacted into law in the tenth member state. The provisions, which become effective at that time, shall be limited to the powers granted to the commission relating to assembly and the promulgation of rules. Thereafter, the commission shall meet and exercise rulemaking powers necessary to the implementation and administration of the compact.
b. Any state that joins the compact subsequent to the commission’s initial adoption of the rules shall be subject to the rules as they exist on the date on which the compact becomes law in that state. Any rule that has been previously adopted by the commission shall have the full force and effect of law on the day the compact becomes law in that state.

c. Any member state may withdraw from this compact by enacting a statute repealing the same.

(1) A member state’s withdrawal shall not take effect until six months after enactment of the repealing statute.

(2) Withdrawal shall not affect the continuing requirement of the withdrawing state's physical therapy licensing board to comply with the investigative and adverse action reporting requirements of this act prior to the effective date of withdrawal.

d. Nothing contained in this compact shall be construed to invalidate or prevent any physical therapy licensure agreement or other cooperative arrangement between a member state and a non-member state that does not conflict with the provisions of this compact.

e. This compact may be amended by the member states. No amendment to this compact shall become effective and binding upon any member state until it is enacted into the laws of all member states.

Section 12. Construction and Severability.

12. This compact shall be liberally construed so as to effectuate the purposes thereof. The provisions of this compact shall be severable and if any phrase, clause, sentence or provision of this compact is declared to be contrary to the constitution of any party state or of the United States or the applicability thereof to any government, agency, person or circumstance is held invalid, the validity of the remainder of this compact and the applicability thereof to any government, agency, person or circumstance shall not be affected thereby. If this compact shall be held contrary to the constitution of any party state, the compact shall remain in full force and effect as to the remaining party states and in full force and effect as to the party state affected as to all severable matters.

L.2017, c.304, s.1.

45:9-37.34i. Intent.

The Physical Therapy Licensure Compact is intended to facilitate the regulation of the practice of physical therapy and no provision of the compact shall be construed as to relieve employers from complying with contractual and statutorily imposed obligations.

**GENETIC COUNSELOR'S LICENSING ACT**

This act shall be known and may be cited as the "Genetic Counselor's Licensing Act."

L.2009, c.41, s.1.

45:9-37.112. Findings, declarations relative to genetic counselors.

The Legislature finds that: the profession of genetic counseling has existed for more than 30 years. Genetic counseling is a communication process which deals with the human problems associated with the occurrence, or the risk of occurrence, of a genetic disorder, birth defect, or intellectual disability in a family. This process involves an attempt by one or more appropriately trained individuals to help an individual or family: comprehend the medical facts, including the diagnostic, probable course and available management of a disorder, as well as the risk of occurrence in specified relatives; understand the options for dealing with the risk of recurrence; choose the course of action that seems appropriate to that individual or family in view of the risk and the family goals and to act in accordance with that decision; and make the best possible adjustment to the disorder in affected family members and to the risk of occurrence or recurrence of the disorder.

The Legislature further finds that: the profession of genetic counseling profoundly affects the lives of the people of New Jersey; and informed individual decisions to undergo a genetic test and intellectually sound and emotionally healthy responses to the discovery of a genetic anomaly can be facilitated by professional genetic counseling; however, misuse of those same genetic tests or information used for individual decisions may result in inappropriate decision making, loss of privacy, discrimination, inappropriate medical referrals, and unnecessary emotional distress.
The Legislature declares, therefore, that this act is intended to protect the people of New Jersey by setting standards of qualification, education, training and experience for those persons seeking to practice and be licensed as genetic counselors and by promoting high standards of professional performance for those presently practicing as genetic counselors and for those who will be licensed to practice genetic counseling in the State.

All reports submitted under the provisions of this act and any information obtained in the course of inspections shall be deemed confidential and may be examined only upon application to a court of competent jurisdiction in association with proceedings related to suspension, limitation, or revocation of a license under this act. This provision shall in no way interfere with the department's powers to summarize, analyze and publish information obtained during the course of carrying out provisions of this act so long as the specific identity of individual laboratories is not disclosed, nor shall it be considered to limit the department's powers in disclosing results of an action in suspending, limiting or revoking a license of a specific laboratory under the provisions of this act.

Such applicant or licensee shall have the right to be heard in person or through an attorney, and to offer evidence pertinent to the subject of the hearing. A duly certified copy of the order of the commissioner issued as a result of such hearing shall be served on the applicant or the licensee by mail personally addressed to him at his last known address, except if such applicant or licensee be a corporation then the order shall be served in the same manner upon any officer or registered agent of the corporation.

If the commissioner shall have reason to believe that a condition exists or has occurred at a laboratory, in violation of the provisions of this act or the rules and regulations promulgated hereunder, which condition poses an imminent threat to the public health, safety or welfare, he may summarily suspend the license of the laboratory without a hearing and may order immediate correction of such violation as a prerequisite of reinstatement of licensure.
