Amusement Game Certification of Permissibility Number 5-009 Stop and Go Plus

NAME OF GAME: Stop and Go Plus

MANUFACTURER: N/A

APPLICANT: Eric Faranda

The game named above is hereby granted a Certification of Permissibility for operation in New Jersey pursuant to the provisions of the Amusement Games Licensing Law, N.J.S.A. 5:8-100 et seq. (“Law”), and the regulations promulgated thereunder, N.J.A.C. 13:3-1.1 et seq. (“Regulations”). This Certification of Permissibility is based upon information supplied by the applicant at the time of application for certification. The game must be operated in accordance with the Law and Regulations, the specifications submitted by the applicant and the conditions set forth in this certification. Any modification of the specifications as submitted at the time of application or the conditions set forth herein shall immediately void the Certification of Permissibility for any game so operated.

It is unlawful to license or operate any amusement game in the State of New Jersey without a valid Certification of Permissibility or in a manner not in accordance with Certification of Permissibility issued for the game. This Certification of Permissibility contains five pages. This is page 1 of 5.

GAME DESCRIPTION:

“Stop and Go Plus” is a lay-down game with a special bonus feature. The game incorporates a game board with a rotating indicator and a lay down board marked in segments bearing numbers, names or symbols identical to those on the game board. A player(s) places an entry fee on a particular segment of the lay down board to indicate his/her choice of the expected winner. A rotating indicator which is powered and driven by an electric motor is activated and deactivated by a player by means of electrical push-button switches or similar devices approved by the Commission, located along the lay down board. The switches enable any player to activate or deactivate the game’s indicator. The winning number, name or symbol is that which identifies the segment of the game board in which the tip of the indicator rests after its motor has been deactivated. The winner receives a prize designated for a single round of play.

The special bonus feature is when a winner decides to surrender the designated prize from a single round of play and chooses one of the sixty (60) display cases. Inside each individual case will display a prize which is equal to or have a greater value than the initial offered prize. In addition to this feature there are three (3) designated bonus numbers, symbols or letters which are individually inserted into three (3) separate display cases. These three (3) cases are included as part of the sixty (60) displayed cases.

If a player opens a display case containing one of the designated bonus numbers, symbols or letters the player continues to select a second display case. If the second case contains another designated bonus numbers, symbols or letters player continues to select a third and final case. If the player selects all three (3) designated bonus numbers, symbols or letters in any order consecutively, a special bonus Choice prize is awarded based on the posted prize schedule. During this process if the cases are not selected consecutively the game is deemed over and all prizes are awarded.

DEFINITIONS:

“Flapper” means the flexible tip of the indicator.

“Game board” means the segmented board behind the rotating indicator.

“Indicator” means the arm, arrow or other contrivance used to indicate the winning segment on the game board.

“Lay down board” means a shelf area in front of and/or sides of the stand/structure containing the “Stop and Go Plus” game that is divided into segments each of which bears a number, name or symbol corresponding with those on the game board.

“Master control switch” means a switch used to close the circuit allowing electric to flow to the Stop and Go Plus switches enabling a player to start the rotation of the indicator or game board.

“Obstruction” means any portion of the stand/structure, any light or other type fixture, any box, bag, prize or other material that obstructs the player’s view of the entire game board.

“Pin” means the metal pin placed on the outside of the edge of the game board, between each segment.

“Play field” means an area containing the stop an go switches, lay down board, game board and the display cases.

“Prize Category” means a prize, or group of prizes of comparable value, available to a player upon completion of the task necessary to win a prize in a particular category or available to a player by “trade up.”

“Prize category designation” means the identifier of one of the six authorized prize categories.

New Jersey Legalized Games of Chance Control Commission
Certification of Permissibility Number 5-009, Stop and Go Plus

“Professional quality” means that the surface of the sign to be used must be smooth and rigid in nature and not made from paper or corrugated cardboard, unless laminated.

“Round of play” means the sale of a right to participate, the event which determines whether the player wins or loses and the award of the prize.

“Stand/structure” means any stand, structure, booth, tent, trailer or area in which the game is operated.

“ Stop and Go Switch” means an electrical push-button switch or similar device approved by the Commission, which enables a player to activate or deactivate the games indicator

“Trade up” means trading multiple prizes of a lower prize category for a prize in a higher prize category.

CONDITIONS:

- 1.) The maximum price to play shall not exceed values set forth in N.J.A.C. 13:3-3.4.
- 2.) The play field shall be clear of all obstructions.
- 3.) The play field shall be contained within the stand/structure in which the game is located.
- 4.) No merchandise shall be allowed in or around the stand/structure for display purposes only.
- 5.) All prizes displayed must be available to be won either in a single round of play or by trading up through continued play.
- 6.) All prizes available though the play of game shall be conspicuously displayed above the front counter height of the stand/structure.
- 7.) Prizes displayed shall be labeled to indicate requirements necessary to win the prize. Prizes shall be labeled individually or as a clearly delineated group requiring the same game outcome to win.
- 8.) A sign explaining prize category trade requirements shall be conspicuously posted at all times during the operation of the game.
- 9.) The minimum size of a sign containing the statement required by Condition Number 8 of this certification shall be 8.5 inches x 11 inches. The sign shall be of professional quality and shall consist of block letters of at least .50 inch. The backboard and the letters of the sign shall be printed in contrasting colors. Electronic signs complying with the standards set forth herein may be used.
- 10.) If the flapper comes to rest directly on a peg, the winning segment is the segment from which the indicator or game board has traveled.
- 11.) If an indicator utilizes a flapper, the winning number, name or symbol is the one in the segment of the game board in which the flapper rests.

New Jersey Legalized Games of Chance Control Commission
Certification of Permissibility Number 5-009, Stop and Go Plus

- 12.) This game shall have a minimum of six sets of Stop and Go Plus switches available to players at all times. Six single switches that operate as both Stop and Go Plus switch may be utilized. If a Stop and Go Plus switch is out of order, it shall be removed from the play field until it is repaired to proper working order. A Stop and Go Plus switch that is both working properly or has been removed from the play field, shall not be counted when determining the number of Stop and Go Plus switches available to the players
- 13.) All Stop and Go Plus switches shall be located along the lay down board in a location easily accessible to all player.
- 14.) During game play, the rotation of an indicator or game board shall only be activated or deactivated by a player.
- 15.) The master control switch shall not be capable of activating or deactivating a rotating indicator or game board.
- 16.) The mechanism utilized to rotate an indicator or a game board shall not incorporate any clutch, brake or timing device, except:
 - a.) a timing device which renders all of the stop switches inoperative for a minimum time period of three seconds after any go switch is activated: and
 - b.) a clutch which allows the game board or indicator to continue spinning after a player deactivates the motor.
- 17.) The game board shall contain an individual segment for each number, name or symbol, displayed on the lay down board. No lay down board shall bear a number, name or symbol not displayed on the game board. No game board shall bear a number, name or symbol not displayed on the lay down board.
- 18.) All lay down boards shall be easily accessible to all players and securely attached to a horizontal surface on the counter of the stand/structure containing the game.
- 19.) The three (3) designated bonus numbers, symbols or letters shall be available at all times during game play.

This Certification of Permissibility is not a license to operate the captioned gambling device. The game must be licensed in accordance with the Law and Regulations.
